

VN-Index's trend

➤ Weekly chart

Current price: 775 points
 Support level: 750-756 points
 Resistant level: 780-786 points

VN-Index saw 3rd recovering week in a row. Middle and long-term recovering trend is still there since the index still closed above most important MA lines like MA5, 13, and 26. Not just that, ADX increased to 34 and +DI was above –DI, confirming that the current recovering trend is quite strong.

Moreover, other technical indicators are also showing signs supporting the trend, as:

- MACD is increasing positively and staying above Signal line.
- RSI is above 78, showing that recovering motivation is quite strong.

Therefore, we keep our point of view that middle and long-term gaining trend is quite clear. Investors might raise the weight for middle and long-term positions.

VN-Index's trend

➤ Daily chart

VN-Index are showing positive signs since the index closed above most important MA lines from MA5 to MA200. Besides, for technical indicators, MACD is still above Signal line and RSI is above 75, showing that recovering trend is still there.

Not just that, ADX is above 28 with +DI being above -DI, showing that the index might move to challenge resistant level of 786 points (Fib 78.6) next week.

In general, recovering trend is still there. Therefore, investors might consider raising a small weight on good fundamental codes that could lead with positive Q2/2017 business results prospect.

HNX-Index's trend

➤ Weekly chart

Current price: 99.1 points
Support level: 98.8 points
Resistant level: 101.9 points

HNX-Index's recovering trend in middle and long-term is still there since it closed above most important MA lines from MA5 to MA26 and ADX increased to above 35 while +DI being above -DI, supporting recovering trend.

Not just that, other technical indicators are showing positive signs, like:

- MACD increased and stayed above Signal line.
- RSI increased to 82, showing strong recovering motivation.

Therefore, we think that the recovering trend in middle and long-term of HNX-Index is still there. So investors should consider keeping a high weight for middle and long-term positions.

HNX-Index's trend

➤ Daily chart

HNX-Index saw similar situation with VN-Index since it stayed above most important MA lines from MA5 to MA200, showing that short-term recovering trend is still there.

Not just that, other technicators like ADX and RSI still showed that recovering motivation is still there since RSI recovered again to 67 while ADX was above 42 with +DI being above -DI, showing that the index might move to challenge 101.9 points (Fib 100).

Therefore, we think that short-term recovering trend is still there, so investors might consider raising a small weight in the portfolio.
