The market returned after the holiday with green being on both exchanges, but the situation still struggled since there were still more droppers.

The index surpassed 790 point level and closed at 792.31 points (+0.45%). Matched volume was 153.1 million shares (+11.0%) for 3,098 billion (+8.5%).

The information on China steel factory fire pushed steel price up so steel codes saw a positive session with HPG (+0.9%), POM (+4.2%), TLH (+1.2%), NKG (+0.3%). At the same time, the gaining effort from gas codes GAS (+1.9%), PLX (+0.3%), PVD (+0.7%) with raw oil price recovering after Harvey storm supported VN-Index. SAB (+0.2%) gained slightly to 255,000 dong/share after HSC announced that the State will sell 53.59% shares in this company. Besides, the gain was also on other food codes VNM (+0.7%), KDC (+3.5%), ANV (+6.6%). Real estate hasn't slowed down with LDG (+0.9%), TDH (+1.2%) and VIC (+1.6%), showing positive gaining trend since this company joints in Vietnam car industry, which is expected to support the price in near future. Meanwhile, finance saw different situation. For banking, VCB (+1.9%), STB (+2.2%) could still stay in green while BID (-0.5%), CTG (-0.8%) placed pressure on the index. At the same time, securities also saw similar situation, as VND (+2.1%), AGR (+2.1%) gained and SSI (-0.4%), BSI (-4.5%), VDS (-1.5%) were different.

Foreign investors saw a net buying of 59.8 billion on HOSE (-43.8%), focusing on VNM (+34.1 billion), PLX (+21.3 billion), VCB (+19.3 billion) and the net selling was strong on MSN (-35.6 billion), NVL (-21.6 billion), VIC (-17.8 billion).

HNX shook during the session. HNX-Index closed at 104.38 points (+0.55%). Matched volume was 35.5 million shares (+22.9%) for 427.0 billion (+30.9%).

HNX-Index was supported from banking with many gainers like ACB (+1.4%), NVB (+1.4%), SHB (+1.3%). Besides,

construction was also positive with VC3 (+2%), PHC (+4.1%) and HUT (+3.4%) after seeing strong foreign net buying. Meanwhile, real estate saw different situation with CEO (-1.9%), BII (-3.1%), IDJ (-2.9%) along with securities with many droppers SHS (-1.3%), VIX (-2.6%), WSS (-2.3%), BVS (-1%).

Foreign investors saw a net buying of 8.0 billion on HNX (3.6%), focusing on HUT (+6.0 billion), VCG (+1.7 billion), PVS (+1.1 billion), and CEO (-1.2 billion), ACB (-0.5 billion), SHN (-0.4 billion) were sold the most.

In technical term, VN-Index saw the 4<sup>th</sup> gain in a row. The volume increased comparing to previous session, showing holiday cautiousness might be released. Not just that, the index still stayed above MA5 and 20, and +DI still loosened the gap above -DI, showing that recovering trend is still there. Moreover, other technical indicators like MACD and RSI are increasing positively, showing that recovering motivation is getting stronger so the index might move to challenge sentimental resistant level of 800 points in the next few sessions. For HNX, HNX-Index saw similar situation. It gained and stayed above MA20 with higher volume than previous session, showing that recovering trend is still there and the index might move to challenge 105.9 points (Fib 127.2). In general, the gain on September 5 showed that the recovering trend is still there and the market might move to challenge higher resistant levels. Therefore, investors might consider raising a small weight on good fundamental leading codes.

### **Finance Supervisory Committee: credit at the end of August is 11.5% higher than beginning of the year**

According to Finance Supervisory Committee, credit growth in August is still positive. Expectedly as the end of August 2017, credit growth is about 11.5% comparing to the end of 2016 and 10.2% YoY.

Short-term credit is higher than middle and long-term.

In which, middle and long-term credit weight dropped further, short-term credit growth is about 14.1% (same period 2016 was 9%), 45.9% total credit (44.9% in the end of 2016). Middle and long-term credit growth is about 8.8%, same period last year was 11.1% - 54.1% total credit.

Credit structure in section nearly didn't change comparing to the end of last year. Credit weight for industry and construction is about 31.2%; service is about 37.4%; agriculture, forestry, and aquaculture and trade, transportation, and telecommunication is still stable.

As of the end of July 2017, credit organization system EAT is 41 trillion dong, up by 59.7% YoY, mainly because of credit and service activities. In detail, net profit from credit activity increased strongly because of high credit growth, net profit income is 2.9% while same period was 2.7%.

Banks' bad debt focused in some weak credit organizations, with weak financial and management skills, and being in restructuring status. As of June 30, 2017, bad debt is reported at about 157 trillion, 21.5% higher than the end of 2016. Bad debt rate is about 2.9% (2016 was about 2.6%).

### **Can interest rate drop further?**

Finance Supervisory Committee economic and finance market report in August and 8 months 2017 stated that in August 2017, banking system liquidity is still quite strong since:

Firstly, interbank interest rate is low (overnight and 1 week is 1%/year, 1 month is 1.6%, slight higher than the end of July 2017 by 0.2-0.3 percent points). Secondly, on open market, from August 01-22, SBV saw a net collection of 4,494 billion, accumulated from the beginning of the year is 32,632 billion.

On the market, interest rate is quite stable comparing to last month. As of August 21, 2017, 1 month average interest rate is 4.7%/year, 6 month is 5.68%/year, 12 month is 6.8%/year, and 12-26 month is 7.07%/year, similar to mobilizing interest rate in July.

Loan interest rate for 5 priority sections is 6.5%/year, even 6% in some banks; for common production and business, common interest rate is 9.3-11%/year for 6 month and up periods.

Talking to Stock Investment, the Committee high-end leader stated that it is still supportive for lowering loan interest rate in the last few months of 2017.

In detail, the pressure from exchange rate is not too strong since Bloomberg Dollar Index dropped strongly comparing to the beginning of the year (-9.3%); the pressure from government bond issuance is not strong either (about 20% target); supportive element from managers about dealing with bad debt will contribute more positively in lowering interest rate.

Banks leaders think that loan interest rate must be stable in accordance with the Government and SBV direction to support the economy. Therefore, output-input interest rate range is still shrinking. More importantly, loan interest rate dropping space is almost all exploited and is reflected with lowest interest rate in recent 10 years.
