

VN-Index's trend

➤ **Weekly chart**

Current price: 840 points
 Support level: 820-825 points
 Resistant level: 870-875 points

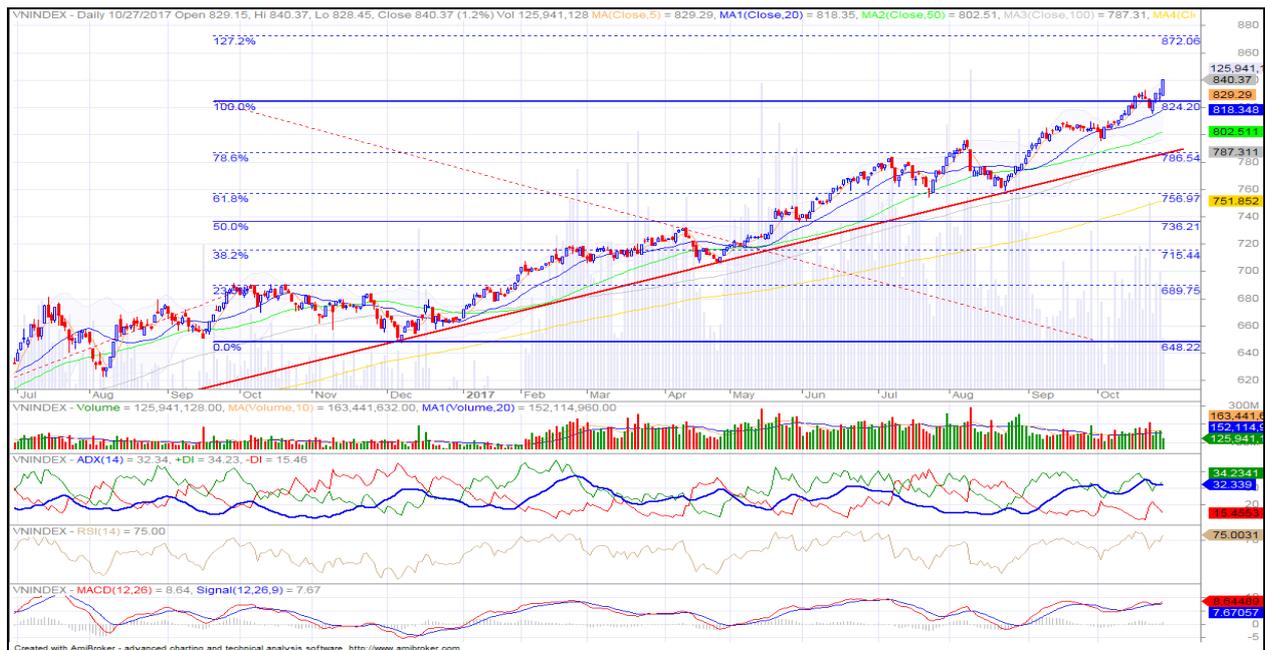

VN-Index saw the 4th gaining week in a row. Middle and long-term recovering trend is still there as the index closed above most important MA line like MA5, 13, and 26 and stayed above gaining trend line (forming from bottoms of January and December 2016 until now).

Not just that, other technical indicators like RSI, MACD, or ADX still supported current trend. RSI increased to 79, MACD was above Signal line, confirming middle and long-term buying signs, and +DI was still above –DI, showing that the index might move up in near future.

Therefore, we think that middle and ong-term gaining trend is quite positive. Therefore, investors might keep a high weight in the portfolio for long-term positions.

VN-Index's trend

► Daily chart

VN-Index showed positive uptrend motivation, as it gained at the end of the week and broke sentimental resistant level of 840 points. Moreover, the index closed above MA5 while MA20 and 50 tended upward, showing that short-term gaining trend is still there.

Not just that, other technical indicators also supported the trend, as MACD and ADX still increased. Especially, ADX increased to 32 with +DI being above –DI, showing that gaining trend is confirmed, so, the index might move to challenge sentimental resistant level of 850 points next week.

Therefore, we think that the gaining trend is still maintained, so, investors might raise a small weight on the codes that can lead.

HNX-Index's trend

➤ Weekly chart

Current price: 106.4 points
 Support level: 105.9 points
 Resistant level: 110.9 points

HNX-Index's middle and long-term recovering trend is still there, as the index still closed above long-term gaining trend line (forming from bottoms of December 2016 and April 2017). At the same time, MA13 and MA26 are on positive uptrend. Not just that, ADX is increasing to 49 with +DI being above -DI, confirming current gaining trend.

However, the index dropped to close below MA5, while RSI tended to drop to below 70, showing that short-term correcting pressure is getting stronger. Therefore, the index might see short-term correction to support middle and long-term gaining trend.

Therefore, we think that middle and long-term recovering trend for HNX-Index is still there. However, the index might need more short-term correction to support the trend. So, middle and long-term investors might use short-term correction to restructure the portfolio.

HNX-Index's trend

➤ Daily chart

HNX-Index might be in short-term correcting trend, as it dropped to close below MA5 and 20. Meanwhile, ADX dropped and -DI has cut up to +DI, meaning that previous recovering trend might already end.

Not just that, other technical indicators like MACD are dropping negatively, showing stronger selling signs, and RSI dropped to 45, showing stronger correcting pressure. So the index might drop to challenge support level of 105.9 points (Fib 127.2).

Therefore, we think that short-term correcting trend for HNX-Index is still there. So, we think that investors should bring the portfolio to a safe position.
