

VN-Index's trend

➤ Weekly chart

Current price: 1,062 points
 Support level: 1,025-1,030 points
 Resistant level: 1,100-1,110 points

VN-Index middle and long-term gaining trend is still there, as it stayed above MA5, 13, and 26. At the same time, the index also stayed above long-term gaining trend (forming from bottoms of January and December 2016 until now), and ADX is increasing to 54 with +DI being above –DI, meaning that the gaining trend is quite strong and clear.

Not just that, other technical indicators also supported current gaining trend, as MACD increased to above Signal line and RSI showed signs of increasing again to 89, showing positive gaining motivation.

Therefore, we think that the middle and long-term gaining trend is still there. So, investors might maintain a high weight for middle and long-term positions.

VN-Index's trend

▸ Daily chart

VN-Index is in short-term gaining trend, as it closed above most important MA lines from MA5 to MA200. At the same time, trend indicator ADX is above 45 with +DI being above and tending to raise the gap with -DI, confirming current gaining trend.

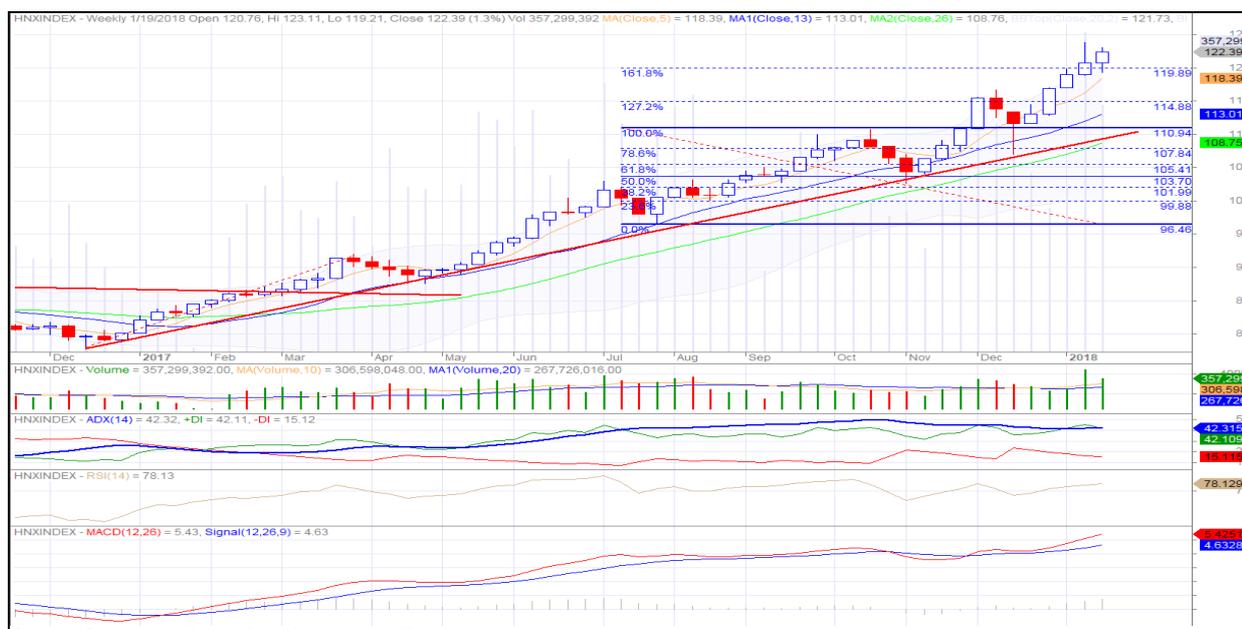

Not just that, other technical indicators also showed positive signs, like MACD showed dropping sign but still stayed above Signal line, meaning that buying signs are still there and RSI was above 72, showing that gaining motivation is still quite strong, and the index might move to challenge resistant level of 1,111 points (Fib 100) next week.

In general, VN-Index's short-term main trend might still be increasing. Therefore, investors might raise a small weight on leading codes with positive business results prospect.

HNX-Index's trend

➤ Weekly chart

Current price: 122.3 points
 Support level: 119.9 points
 Resistant level: 125 points

HNX-Index's main trend in middle and long-term is still there as the index stayed above most MA5, 13, and 26, and ADX increased to 42 with +DI being above -DI, showing positive recovering trend.

Not just that, other technical indicators still confirmed the trend, like:

- MACD is above Signal line, meaning that buying signs are maintained.
- RSI increased to 78, showing positive gaining motivation.

Therefore, we think that HNX-Index's middle and long-term recovering trend is still there. So middle and long-term investors might hold on to the high weight in their portfolios.

HNX-Index's trend

➤ Daily chart

HNX-Index's short-term gaining trend is still there as the index stayed above MA5 and 20 with ADX increasing to 36 and +DI being above -DI, confirming current gaining trend.

Moreover, trading volume increased and stayed above 10 and 20 session average, meaning that the cash flow is positive. Along with it, RSI tended to recover again to 66, showing that gaining motivation is getting stronger, and the index might move to challenge sentimental resistant level of 125 points

Therefore, we think that HNX-Index's short-term recovering trend is still there. Therefore, investors might consider raising a small weight on leading codes with positive business results prospect.
