

VN-Index's trend

➤ **Weekly chart**

Current price: 1,121 points
 Support level: 1,060-1,070 points
 Resistant level: 1,170-1,180 points

VN-Index might still be in middle and long-term gaining trend, as it saw another gaining week and stayed above MA5, 13, and 26. At the same time, the index also stayed above long-term gaining trend (forming from bottoms of January and December 2016 until now), and ADX is increasing to 50 with +DI being above –DI, meaning that the gaining trend is quite strong.

Not just that, other technical indicators also supported current gaining trend, as MACD is increasing to above Signal line and RSI showed signs of increasing to 72, showing positive gaining motivation.

Therefore, we think that the middle and long-term gaining trend is still there. So, investors might maintain a high weight for middle and long-term positions.
