

VN-Index's trend

➤ **Weekly chart**

Current price: 1,0017 points
 Support level: 980 – 990 points
 Resistant level: 1,020 – 1,030 points

VN-Index is on long-term gaining trend since the index gained to above MA26 and stayed above long-term trend line (forming from the bottoms of January and December 2016 until now).

Besides, middle-term recovering trend is also still there, since technical indicators are showing positive signs, as:

- The index stayed above MA5 and MA13 is pointing upward again, supporting recovering trend.
- MACD cut up to Signal line, confirming buying sign.
- RSi increased to 54, showing stronger recovering motivation

Therefore, we think that VN-Index is on middle and long-term gainign trend, so investors might maintain a high share weight for long-term positions.

VN-Index's trend

▶ Daily chart

VN-Index's short-term recovering trend is still there, since the index closed above MA20 and MA5, 20, and 50 are showing positive differentiation, supporting current recovering trend.

Not just that, other technical indicators also showed positive signs, like MACD stayed above Signal line, confirming buying signs and RSI increased to 69, showing stronger recovering motivation, so the index might move to challenge resistant level of 1,026 points (MA200). If this level is broken, the next one might be 1,050 points

In general, short-term recovering trend is still there, so investors might use the shakes to raise a small weight on good fundamental codes with positive 2018 prospect.

HNX-Index's trend

➤ Weekly chart

Current price: 116.2 points
 Support level: 110.2 points
 Resistant level: 120.5 points

HNX-Index's middle and long-term recovering motivation is getting stronger since trend indicators are being confirmed, as the index closed above most important MA lines from MA5 to MA26 and the volume increased to above 10 and 20 session average, showing positive cash flow.

Moreover, delayed indicators are also showing positive signs, as MACD increased to Signal line, confirming long-term buying signs, and RSI increased to 53, showing better gaining motivation.

In general, HNX-Index's middle and long-term recovering trend is returning. Therefore, investors might consider buying at a small weight for long-term positions on HNX.

HNX-Index's trend

➤ Daily chart

HNX-Index is on short-term recovering trend, since it stayed above MA5 and 20 with positively increasing volume, showing that short-term recovering trend is still there.

Not just that, our technical indicators are showing signs supporting current trend, as MACD increased to Signal line and RSI increased to 70, showing positive recovering motivation, so the index might move to challenge resistant level of 117.9 points (MA200) in the next few sessions.

Therefore, we think that HNX-Index's short-term recovering trend is still there. So investors might consider buying a small weight on leading codes with positive 2018 business prospect.
