

VN-Index's trend

➤ Weekly chart

Current price: 970 points
 Support level: 920 – 930 points
 Resistant level: 990 – 1,000 points

VN-Index's long-term gaining trend might still be there since the index stayed above long-term uptrend line (forming from bottoms in January and December 2016 until now).

However, middle-term correcting pressure is returning since other technical indicators are showing negative signs, as:

- ADX increased to 21 with –DI showing signs of cutting up to +DI, confirming the return of correcting trend.
- RSI dropped to 46, showing weakening recovering motivation.
- The volume increased to above 10 and 20 week average, showing stronger selling pressure.

Therefore, we think that VN-Index is seeing middle-term correcting pressure.

VN-Index's trend

▶ Daily chart

VN-Index's short-term trend is moving on negative direction as the price line is dropping to close below MA20 and MA5 cut down to MA50. Not just that, ADX increased to 23 with – DI cutting up to +DI, confirming current trend.

With closer look, we see that other technical indicators are also showing negative signs, as MACD stayed below Signal line, maintaining selling signs, and RSI dropped to 40, showing weakening recovering motivation. Closest support level might be 920-930 points (long-term uptrend line).

In general, correcting pressure is quite negative, therefore, investors should consider using technical recoveries to bring the weight to a safe level.

HNX-Index's trend

➤ Weekly chart

Current price: 109.7 points
 Support level: 103 points
 Resistant level: 110.5 points

HNX-Index is seeing middle-term correcting pressure since it saw another dropping week and closed below MA13 and 26 again, and the volume increased strongly, showing strongly increasing selling pressure.

Not just that, other technical indicators also showed negative signs, as:

- ADX increased to 21 with –DI cutting up to +DI, confirming dropping trend.
- RSI showed signs of dropping to 44, showing weakening recovering motivation.

In general, HNX-Index's middle-term correcting pressure is increasing. Therefore, investors should consider lowering the weight for middle-term positions.

HNX-Index's trend

➤ Daily chart

Similar to VN-Index, HNX-Index also stayed on short-term correcting trend, since the index closed below MA20 and MA5 cut down to MA50.

Not just that, our technical indicators are showing negative signs, as:

- ADX increased to 22 with –DI cutting up to +DI, confirming current correcting trend.
- RSI dropped to 38, showing increasing correcting pressure.
- MACD cut down to Signal line, maintaining selling signs.

Therefore, we think that HNX-Index's short-term trend is quite negative, therefore, investors should consider lowering the weight and observe the market cautiously.
