#### REMARKABLE POINTS ON THE MARKET

The market struggled within a small range. VN-Index gained slightly in the morning following previous session excitement. The market saw correcting pressure after that in the beginning of the afternoon as it recovered to reference at the end. The market saw balance between gainers and droppers. In which, some groups gained consistently like steel, rubber, sea transport, Viettel, sugar, and construction or some real estate midcap and penny codes. Total trading value increased but the growth came from a big foreign agreement trade related to MSN. Therefore, matching trade alone saw lower liquidity. MSN agreement trade is also the reason for foreign investors net selling pressure increasing today.

### **TECHNICAL POINT OF VIEW**

In technical term, VN-Index saw another gain. The volume stayed below 10 and 20-session average, showing cautious cash flow. However, recovering trend is still there as the index stayed above MA5 that increased, and MA5 still differentiated positively from MA20, showing that it might still gain. Moreover, RSI increased to 63 and +DI widened the gap above -DI, showing that gaining trend is still there and the index might soon challenge close resistant around sentimental level of 1,300 points or further on 1,400 points. For HNX, HNX-Index saw similar situation. The index gained further and stayed above MA5, and MA5 still differentiated positively from MA20, showing that recovering trend is still there and the index might challenge sentimental level of 250 points. In general, the market is still on recovering trend after the gain on March 27. Therefore, investors might use technical shakes to restructure the portfolio. In which, having priority on good-fundamental codes with positive business prospect that can attract strong cash flow.
